Career Objective

Aspiring engineer eager to contribute to a collaborative team using cutting-edge technologies. Highly self-motivated and passionate about continuous learning, with strong communication skills. Proven ability to work effectively in a team and focused on achieving goals.

Technical Skills

- Python
- HTML, CSS, Javascript
- Java
- R language
- Big Data Analytics
- Data Science with R
- Machine Learning
- MySQL

Academic Projects

Inventory Management System | Java ,MySQL, CSS, PHP

- Developed a software application using Java, MySQL, CSS, PHP that facilitates product management (addition, updating, removal), monitors stock levels, and records all inventory transactions for transparency. It generates insightful reports to aid in decision-making, reducing stockouts and overstock situations.

Intelligent Career Navigator | Python, ML, Flask

- Developed Career Navigator, a Python-Flask web app with HTML, CSS, and JavaScript, using a Random Forest model to provide personalized career recommendations based on user data. Designed a responsive UI with streamlined CSS, interactive forms, and modals to support career planning.

Internships

- Online internship from AICTE Cohort 9

Completed a 10-week virtual internship focused on data engineering fundamentals, cloud concepts, and data processing workflows using AWS Academy resources.

Certifications

- AWS Academy Graduate - AWS Academy Cloud Foundations
- Data Engineering Virtual Internship - AWS Academy , AICTE internship
- Introduction to Cybersecurity - Cisco Net Academy
- Blenders Training by Spoken Tutorials
